ETERNO IVICA NEW MAXI NM ADJUSTABLE SUPPORT

The NM range of adjustable fixed head supports are perfect for any kind of raised flooring applications with a minimal slope. Slight falls can be accommodate using the Eterno Ivica range of rubber shims found in the Accessories section.

NM is suitable for a variety of applications including decking and paving and is also suitable for use with Eterno Ivica Aluminium Joist System.

FEATURES:

- > Precision adjustment from 25 to 270mm using the Eterno Adjustment key
- > Heights up to 935mm achievable with NM Extensions
- > Integral anti-noise and anti-slip rubber bi-component head
- > Smooth support base of 320cm²
- > Resistant to acids and ultraviolet deterioration
- > Resistant to temperatures from -40 °C to +120°C
- > Fully recyclable
- > Can be used in conjunction with any outdoor flooring or decking

COMPATIBLE HEADS:

- > Bi-component head for tiles
- > Head for decking
- > 2 way head for aluminium joist system
- > 4 way head for aluminium joist system

ETERNO IVICA SE SELF-LEVELLING ADJUSTABLE SUPPORTS

The original and still the most innovative pedestal. The Eterno Ivica SE Adjustable Self-Levelling Support with a self-levelling head was the first of a long series of accessories for external elevated floors. It's a pedestal that combines superb technical features and exceptional aesthetics with maximum easiness of installation.

The dished head of the SE support enables it to correct slopes of up to 5%, adjustment is performed using an adjustment key, also manufactured by Eterno Ivica, which enables the paving to be levelled accurately with the paving in-situ. Trusted by architects, builders and installers worldwide, SE provides the perfect flooring solution.

FEATURES:

- > Self-levelling head, will automatically correct slopes of up to 5%
- > Adjustable height from 28 to 550mm, the most versatile pedestal on the market 320 cm² smooth base support
- > Fully recyclable
- > Resistant to temperatures between -40° to 120°C
- > Resistant to acids and ultraviolet deterioration
- > Suitable for use with any self-supporting outdoor paving system
- > Non-slip and anti-noise rubber incorporated in head
- > Tabs easy to remove

COMPATIBLE HEADS:

SE can be used with the following heads to make it perfect for any installation

- > Self-levelling head for tiles
- > XL Self-levelling head for tiles
- > Self-levelling head for decking
- > 2 way head for aluminium joist system
- > 4 way head for aluminium joist system

SMA SELF-LEVELLING A1 RATED SUPPORT

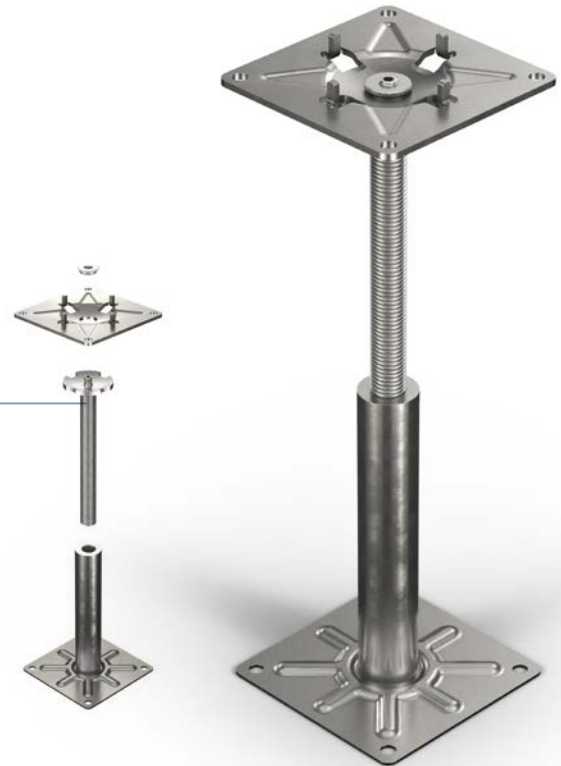

Adjustable metal support for elevated flooring, with self-levelling tilting head that can correct slopes up to 5%.

The support consists of a 100mm x 100mm square base which is 1.8mm thick, and a screw of threaded bar at the end of which is fixed a concave element that acts as the support seat of the tilting head. The support is completed by a self-levelling tilting head with 4mm tabs and an anti-tilting locking ring.

SMA is suitable for use in Paving applications.

Height adjustment is done manually with a 4mm Allen key; the support can reach heights ranging from 27mm to 458mm.

ETERNO IVICA SBP ADJUSTABLE SUPPORT

The Eterno Ivica SBP is a value, yet still robust range of fixed head adjustable supports suitable for use with paving and decking systems. Slight slopes and imperfections in the substrate can be corrected by using the Eterno Ivica shims.

Adjusted with the standard adjustment key.

FEATURES:

- > Adjustment possible with floor in-situ
- > Smooth support base of 320 cm
- > Resistant to weathering, acids, UV rays
- > Resistant to temperatures ranging from -40 °C to +120°C
- > Fully recyclable
- > Can be used in conjunction with any outdoor flooring

COMPATIBLE HEADS:

- > Fixed head for tiles
- > Fixed head for decking
- > 2 way head for aluminium joist
- > 4 way head for aluminium joist

ETERNO IVICA SBPA SELF-LEVELLING ADJUSTABLE SUPPORT

The Eterno Ivica SBPA range is a smaller, value product that is still robust and sits alongside the SE range in terms of its adjustability and is also able to self-correct slopes of up to 5%.

The product is easily adjusted with the installation with the Eterno Ivica adjustment key, which means the whole floor can be levelled with the tiles in position.

FEATURES:

- > 300 cm² smooth base support
- > Entirely recyclable
- > Resistant to temperatures between -40° to 120°C Resistant to acids and ultraviolet deterioration Suitable to any self-supporting outdoor paving system

COMPATIBLE HEADS:

ETERNO IVICA STAR-T LOW HEIGHT ADJUSTABLE SUPPORT

This innovative little adjustable support can be used from 8mm up to 30mm and solves the problem of laying paving up to existing low door thresholds.

STAR.B is the only extension that fits Star.T, that enables to reach NM1 and SE0 adjustable supports; only one height for a versatile and simple product: it is placed under the Star.T increasing its height by 5mm and with the possibility to add more Star.B on top of each others in case of need.

Using 2 Star.T Extensions with the Star.T support you can reach a height of 25mm: from this height you can use the NM supports. Using 3 Star.T Extensions with the Star.T support you can reach a height of 30mm, height beyond which it is possible to use the SE supports.

FEATURES:

- > Height adjustment with Eterno adjustment key
- > The thinnest and most adjustable in the world
- > Millimetre accurate adjustment from 8 to 30mm
- > Possibility to raise of 8mm with one of the two components, then adding 5mm extra with Star.B

FASTFLOW ALUMINIUM JOIST

The new Fastflow aluminium joist is a "double joist" consisting of two profiles spaced by a 6.5mm gap which serves as drainage for the rapid outflow of rainwater.

It has been designed for the installation of porcelain stoneware slabs, multi-format slabs, wooden planks and composite material.

The upper part is equipped with two special channels into which a PVC gasket can be placed. As well as the anti-noise function, it also keeps the slabs or the wooden planks distanced from the aluminium joist for a perfect ventilation of the structure.

Compatible with all pedestal heads accepting aluminium joists, tile spacers that slot directly into the joist ensure paving remains secure and correctly spaced.
